

“Front End Programs”

Task - 2

FRONT END PROGRAMS

LMS Username	Name	Batch
2113a53220	BRINDHA	A53

Task - 2

Create various Front End Programs

- Draw and design a uniform front end code for calculator
- Draw and design a interactive front end code for text-editor

Evaluation Metric:

- 100% Completion of the above tasks

Learning Outcome

- Get to know about concepts of project bucketing
- Knowing about various frontend development framework like angular, vue,react
- Know about various react topics like components, props, state, life cycle etc.

Code for Calculator

Code for Calculator.txt

Code for Text Editor

Code for Text Editor.txt

Step-Wise Description

```
<!DOCTYPE html>

<html>

<head>

<!-- Add metadata and links to external resources here -->

</head>

<body>

<!-- Add the content of your web page here -->

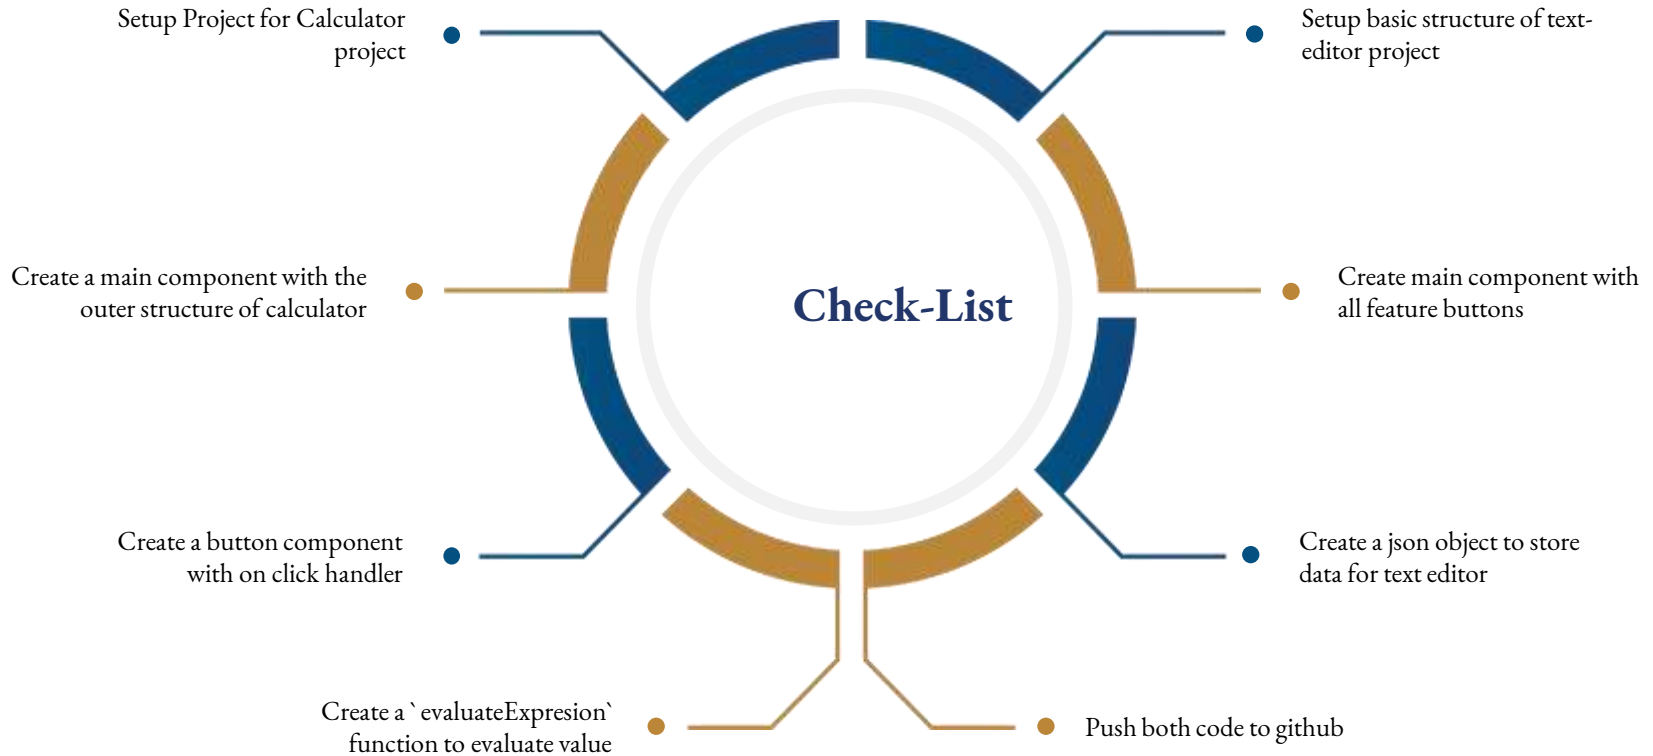

</body>

</html>
```

Summary of your task

Front-end programs are software applications that are designed to be used by end-users directly. These programs typically provide a graphical user interface (GUI) that allows users to interact with the software and perform various tasks. The primary focus of front-end programs is to provide a user-friendly experience for the end-user . Front-end programs are used in a wide range of industries and applications, including web development, mobile app development, desktop software, and gaming.
